EDUCATION

Presidency University, Bengaluru - B.Tech in Computer Science and Engineering (Expected 2028) | CGPA: 9.27/10

TECHNICAL SKILLS

Programming: Python (Intermediate), C (Coursework), Java (Beginner), JavaScript & TypeScript (Project Experience)
Data Science & ML: PyTorch, Deep Learning Fundamentals, Feature Engineering, ONNX (Prototype/Lab Exposure)
AI & Generative AI: Google Gemini API, Google GenAI SDK, LangChain, RAG, ChromaDB, Hugging Face Embeddings
Web Technologies (Project Exposure): HTML, CSS, Bootstrap, React, Next.js, Tailwind CSS, Node.js, Streamlit
Tools & Platforms: Git, GitHub, Google AI Studio, Google Cloud Console (OAuth 2.0), Docker, n8n, Figma, MySQL

SELECTED PROJECTS

1. ScamSniffer - AI Recruitment Fraud and Phishing Inspector (TypeScript, Node.js, Python, Gemini)
- Combines Gemini linguistic evidence extraction with a deterministic rule engine for a 0-100% Scam Threat Index.
- Evaluates 6 fraud vectors and supports UNABLE_TO_VERIFY outcomes; documents 24 Node.js and 12 Python tests.

2. EcoTech PU - Campus Resource Intelligence Dashboard (TypeScript, React, Next.js, Tailwind CSS, Supabase)
- Organizes electricity, water, and waste baseline analysis using a Measure -> Detect -> Act -> Verify workflow.
- Uses simulated demonstration data (not live sensors); repository documents 59 passing tests.

3. RAG-Based PDF Chatbot (Python, Streamlit, LangChain, ChromaDB, Hugging Face Embeddings, Gemini API)
- Chunks PDFs (1,000 chars / 200 overlap), retrieves top-3 chunks from ChromaDB, and generates grounded answers.

4. AI-Based Password Strength Prediction - Research Prototype (Python, PyTorch, Feature Engineering, ONNX)
- Hybrid 2-layer BiLSTM with attention pooling + 22-feature MLP branch and ONNX INT8 export (synthetic data only).

EXPERIENCE

Web Development Intern - InAmigos Foundation (May 13-26, 2026 | 14-day internship)
- Improved NGO awareness webpage content, analysed UI/UX flows, and designed Figma layouts for donations/volunteers.
- Applied HTML, CSS, Bootstrap, and AI-assisted frontend workflows to refine campaign and impact showcase layouts.

ACHIEVEMENTS, HACKATHONS & WORKSHOPS

- Second Place: Tech Tambola - Technopia, Presidency University (January 2026, two-person team)
- PromptWars AI Challenge (GEN AI CLUB & Hack2Skill): Developed ScamSniffer recruitment fraud inspector
- Build with Trea Hackathon (Team Dark Pulse): Contributed to team University Face Attendance System
- Workshops & Bootcamps: AWS Core Skills Bootcamp (Sept 1, 2026, Participation) | MCP Mega Workshop (NxtWave, Completed)
